of catalogue

How to use our catalogue?

In order to make our catalogue easier to use, we have introduced a series of pictogramms, which you will find on the cover flap at the end of the catalogue. You can open this flap when looking up for the best adapted products.

FUJI RANGE - Page 53

Fuji 14

Fuji 17

Fuji 19

Fuji 21

Fuji 23

Fuji 27

New sizes now available in the Fuji range!

Fuji containers can be used for both nursery plants and ornamental plants (flowering or green).

DUO X - Pages 30 and 32

Duo X 9 low 5°

Duo X 10,5 low 5°

Duo X 9 high 5°

Duo X 10,5 high 5°

New base design for our thermoformed pots in the Duo X range.

NEW COLOUR RANGE

Almond Green 53

Parma DL

Bamboo Green D3

Red DF

Now available in the following ranges:

- Eole Bowls - Page 81
- NJ Window-Boxes - Page 77
- Easy Window-Boxes - Page 78

UNDERSTAND OUR RAW MATERIALS

To help you support the circular economy, find out about the origin of our raw materials as well as information on the recyclability of our products on pages 10 & 11.

5

EOLE BOWLS - Page 81

Our Eole range is expanding!
The Eole Ø23 and Ø27 bowls in Grey WD are now also available in box-pallets.

INTEGRATION OF THE CEP RANGE

Low containers YPP - Page 63

Available sizes:
3L - 4L - 5L - 7.5L -
10L - 15L and 20L
Colour: Grey WD

SH square pots - Page 60

Available sizes:
1,25L - 5,5L and 7L
Colours: Taupe WE
and Black 01

VF square round pots - Page 58

Available sizes:
2L - 3L - 4L and 5L
Only available on
special order.

NEW REFERENCES AVAILABLE IN GREY

Stakes - Page 17

Large containers (15L to 30L) - Page 66

CS square pots (9x9x10 and 10x10x10) -
Page 55

Decor Bowls 12-16 and 18 - Page 82

6 Packs for 9 cm pots (single and double
packs available) - Page 43

6 Packs for 10.5 cm pots - Page 43

**All our products (excluding those in
black) are Cyclos certified (NIR detection
and, for polypropylene products, density
<1).**

NOVELTIES

WORKING TOGETHER WITH GROWERS FOR HALF A CENTURY

For more than 50 years, SOPARCO has been constantly investing and innovating in order to develop and support horticulture. Our industrial family-owned French company is built on true values: listening, proximity, expertise, service, and protection of the environment.

SCAN

With a head office in France and well established in Europe, we offer cost-effective and original solutions to growers worldwide.

A TAILOR-MADE SERVICE

WHY USE PLASTIC POTS?

Since 1985, SOPARCO has been applying an **Eco-responsible approach** in every industrial process and in new product developments.

Our extensive know-how both of the horticultural market and of the plastic industry enables SOPARCO to design and develop high-quality products with the minimum environmental impact.

In close cooperation with national and international organizations responsible for the implementation of plastics waste recovery solutions, SOPARCO intends to demonstrate the ecological added value of plastics in a sustainable production process.

Light yet durable products.

Nearly endless possibilities of shapes to answer a wide range of technical requirements (such as multi-tier pot base, reliable label slots...).

Automation of production.

High resistance to weather conditions.

Easy storage.

Easy customization of the products (pot colour, printing of the pot, use of IML...).

Affordable material.

Recycled and recyclable material.

Because it fits perfectly the requirements of professional plant growers.

The use of our products in aquatic environments requires special vigilance. Make sure to organize their collection after use so they won't pollute the aquatic environment. Like all end-of-life plastics, our products must be disposed of in an appropriate bin or recycled in a waste-collection facility. The only harmful plastic is the one ending up in nature.

OUR CSR APPROACH

Plastic is one of the easiest material to recycle (**)

Soparco keeps adapting its range in order to comply with European environmental regulations. Our aim is to offer products that can be recycled after use to meet the objectives of the upcoming European targets for plastics in a circular economy.

100%

of our products
are recyclable

PRODUCTION

- Weight reduction of our products while maintaining their mechanical properties.
- Injection-presses with low-energy consumption.
- Reduction of the products made from polystyrene replaced by products made from polypropylene.

RECYCLED MATERIAL

- Thermoformed ranges: made from 100% recycled material
- Injection-moulded ranges: made from 80% to 100% recycled material
- Many products are now also available in Post-Consumer Recycled Material in several colours.

RECYCLING

- Our standard colours (except Black 01) are NIR detectable. This enables their sorting in waste-collection facilities which means they can then be recycled.
- SOPARCO works with major waste sorting actors to enhance the effective recyclability of plastics in the context of circular economy.
- In France, these partnerships have resulted in the implementation of the «HORTI- ECO» system. This system is based on the recovery of used pots in order to recycle them. Please contact us for more information.

STANDARDS AND CERTIFICATIONS

- All the pigments we use comply with the REACH regulation.
- Cyclos certification providing respect of the material density as well as the NIR detectability of our products.

**Source : Resources, Conservation and Recycling – Volume 105, Part A, Pages 186-197

OUR CSR APPROACH

In a context where economic, social and environmental challenges are closely inter-connected, Corporate Social Responsibility (CSR) stands as a key driver of sustainable development for SOPARCO.

Our commitment is built around three main principles:

- **Ensuring the long-term sustainability of our business** through responsible and innovative growth ;
- **Valuing people**, through concrete actions that promote employee well-being, inclusion, and strong local engagement ;
- **Protecting the environment** by reducing our ecological footprint through the use of recycled materials and optimization of our production processes.

This global approach allows us to build a sustainable and resilient business model that creates value and meaning for all our stakeholders.

From these three core principles, we have defined key priorities specific to our company, around which we structure all our concrete actions:

1 Developing our employer brand

- Promoting employee loyalty and motivation
- Improving the working environment
- ...

2 Reducing and controlling our environmental impact

- Carrying out a carbon footprint audit
- Optimising energy consumption through the use of modern and energy-efficient machinery
- Using recycled and recyclable materials
- ...

3 Protecting people and their skills

- Mentoring production operators
- Offering technical and vocational training
- ...

4 Ensuring asset security and strengthening cybersecurity

- Improving fire prevention systems
- Strengthening IT security to prevent cyberattacks
- ...

5 Being a responsible and ethical business

- Partnering with the Condé-sur-Huisne primary school to educate children about environmental issues through plastic recycling
- Maintaining a high score on the gender equality index
- Building stronger local connections through diverse partnerships
- ...

6 Guaranteeing the long-term success of SOPARCO and the future of horticultural containers

- Defending the industry and endorsing recycled/recyclable plastic pots
- Continuously innovating eco-designed products
- Exploring alternative raw materials
- ...

GLOSSARY

PP: polypropylene

PS: polystyrene

Post Consumer Recycled Material (PCR): recycled material originating from household waste or end-of-life products.

Post Industrial Recycled Material (PIR): recycled material originating from industrial waste.

Recyclable: capacity of a material to be recycled for the production of another product.

Detectable: capacity of a material to be detected by infra-red lights on the sorting equipment of waste-collection centres in order to be separated from other materials thus enabling it to be recycled.

THERMOFORMED RANGES

	Recycled PP 100%	PCR Recycled PP 100%	Recycled PP 100% (40% PCR 60% PIR*)	Recycled PS 100%	Detectable 	Recyclable

ORIGINS AND RECYCLABILITY OF OUR MATERIALS

AND BIO POTS?

Soparco's ALTERECO range offers an alternative to growers who are looking for a different eco-friendly approach.

ALTERECO®

100%

made from natural materials.

0

component containing carbon from the oil industry.

Recycled PLA

is a plant-based material. We preferably use PLA from recycled sources.

TÜV Certified

BIO THERMOFORMED RANGE ALTERECO®

Soparco's bio range of thermoformed containers are manufactured using biosourced materials. With a minimal carbon footprint, the production of this range lends itself to a sustainable development approach.

Material

The PLA (polylactic acid) we use to produce the Altereco® products is made from plant material, preferably from recycled sources (PLA).

A mineral filler is added to the PLA base for opacity. Altereco® products do not integrate any component containing carbon from petrol origin.

Use

The Altereco® pots are usable with potting machines and are compatible with the same irrigation and production systems as standard PP pots. As the pots are industry-compostable, **do not plant the pot with the plant.**

Storage

Bio-sourced material are sensitive to changes in temperature and level of hygrometry. In order to avoid deformations and destacking problems, we recommend to use the products shortly upon receiving them and to store them inside in a cool and dry place. We will not be able to take back goods that have been damaged by improper or extended storage.

MARKETING SOLUTIONS

For those who wish to customize their pots, printing is a really efficient marketing tool. Today, we are able to meet your expectations thanks to different printing processes. Our sales team will advise you on the best method according to your needs.

PRINTING

Flexography printing

This process enables to make a full-colour printing with a photographic quality. This printing technique has a great quality result. Minimum order: 20 000 pots per set.

Offset printing

This printing process gives quality results with a very precise print frame and a durable print. We can print 1 to 4 colours (logos, texts...) Printing fees: personalised quote on demand. Minimum order: 20 000 pots per set.

Silkscreen printing

High quality printing on injected round or square pots.

IML (IN-MOULD LABELLING)

With this technology, a pre-printed polypropylene (PP) label is placed inside the mould before injecting the material. Label and container become one.

The advantages of this process are numerous:

- High-quality print.
- Unlimited choice of colours.
- Possibility to print « square-round » pots including in the label slot recess.
- **Ecological solution: Container and label consist of the same material (polypropylene) and can therefore be fully recycled.**

Different products can be printed. Contact us for any request.

HOW TO PERSONALIZE YOUR POTS?

- Get in touch with your Soparco representative who will advise you on the best adapted technique for your project.

Simple black printing on white label or fullcolour customized label printing, we adjust our labelling solutions to your needs.

We are equipped to label all of our containers (injected pots or thermoformed pots) with labels developed according to your needs (barcode, QR code, logo, etc.):

- Black printing on a white background: size 24 x 40 mm, 40 x 40 mm or 40 x 60 mm
- Standard size: 24 x 40 mm
- Various layouts are possible. Please see our catalogue of standard labels.

Container and label consist of the same material (polypropylene) and can therefore be fully recycled.

EXAMPLES

HOW TO LABEL YOUR POTS?

- Get in touch with your Soparco representative who will advise you on the best adapted type of label.

MARKETING SOLUTIONS

COLOURS

Our colour range allow you to make many associations between the container and the plant. It's one of the easiest way to enhance your productions.
 We keep a close eye on the new colour trends.
 We offer the largest off-the-shelf colour range of the market and a great flexibility to develop bespoke colours.

REACH REGULATION

ALL THE PIGMENTS WE USE COMPLY WITH THE REACH REGULATION.

THE ATTACHMENT SYSTEM

Bedding trays and several Soparco containers are provided with an attachment system. You can easily place labels, carrying handles and label stakes in order to set up your marketing solutions.
 The Soparco labelling system is explained below:

C: Clip

Curved slots at the end of the bedding plant trays.

F: Slot box

The curved slot is placed in the bottom of the slot box.

G: Slot with teeth

Slot with 8 mm teeth and more.
 The 4 teeth are inside the box.

G5: Slot with teeth

G2: Slot with teeth

G2 (new model)

Slot with 7 mm teeth and less.

LABEL STAKES

- Added value to plants
- Good presentation of the label
- The label remains upright

Our Sopafix® are designed to fit the rim of each pot. There may be several Sopafix® versions for the same pot diameter, depending on the width and height of the pot's rim:

Sopafix® 21/2 and 21/4

Sopafix® 21/2 + 4L SMV
and Sopafix® 21/4 + Duo 21

Learn more:

You can find the appropriate Sopafix® reference for your pot in the column listing the suitable Sopafix®.

Drainage*

Height

Transport with forks*

Data based on the comparison of 3 L containers

For forks: if top rim > 4 mm : ****/ between 2 and 4 mm : ***/ < 2 mm : **

For drainage: ratio of base surface on drainage surface, pot bottom structure, number of raised holes

A GLOBAL SOLUTION FOR ALL YOUR PRODUCTIONS

An «eco-friendly» container

The innovative research and highly technical manufacture of the SX container highlights the eco responsible SOPARCO policy through:

- The reduction of material weight while maintaining good mechanical characteristics.
- The use of presses with low energy consumption for manufacturing.
- The use of fully recycled materials for the production of black and some colours.
- Minimal carbon footprint.

1L SX

3 Tier bottom:

- Geometry of the bottom providing a perfect substrate aeration.
- 25 evenly distributed holes in order to ensure an optimal drainage.
- Improved drainage due to starshaped drainage system.
- Central post, in contact with the ground for a good stability of the bottom and optimal drainage.
