<u>Low shape</u>	62	Macroperforated film P93	
SB low shape P62		Robust stake labels P94	
Chrysanthemums P62		Loop labels P94	
YPP low P63			

All new products for the coming year are presented on the following pages and are highlighted in orange together with our characteristic orange novelty logo in the relevant tables.

The products highlighted in grey in the tables are only available on special order.

How to use our catalogue?

In order to make our catalogue easier to use, we have introduced a series of pictogramms, which you will find on the cover flap at the end of the catalogue. You can open this flap when looking up for the best adapted products.

4

4L VXF - Page 58

4L VXF square round container, designed for mechanisation:

- Wide and rigid rim for easy handling with forks
- Round base allowing container rotation on bark-spreading equipment

DUO 9X 8° - Page 33

Bottom suitable for all types of irrigation.

8X8X9 X CS - Page 55

New 8x8x9 square pot, 3-tier base, 4 label-boxes G2.

Ideal for growing perennials.

UNDERSTAND OUR RAW MATERIALS

To help you support the circular economy, find out about the origin of our raw materials as well as information on the recyclability of our products on pages 10 & 11.

EOLE 16 - Page 81

EOLE bowl 16 for growing and floral arrangement.
Ideal for bulbs.

20L SMH - Page 66

Large 20-litre container with a 2-tier base for improved drainage.
Wide and angular shoulder for easy handling with forks.

LABEL STAKE 15.5 - Page 17

NEW SIZE

GREY TRAYS Pages 38 to 41

The trays code 8715, 8748, 877 and 8792 are now available in grey.

OMNIA saucers - Page 63

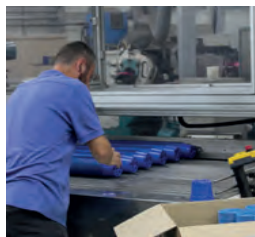

Saucers designed to fit TERRAE® pots

WORKING TOGETHER WITH GROWERS FOR HALF A CENTURY

For more than 50 years, SOPARCO has been constantly investing and innovating in order to develop and support horticulture. Our industrial family-owned French company is built on true values: listening, proximity, expertise, service, and reducing our environmental impact.

SCAN

With a head office in France and well established in Europe, we offer cost-effective and original solutions to growers worldwide.

A TAILOR-MADE SERVICE

Think know-how... Think SOPARCO

WHY PLASTIC POTS?

Since 1985, SOPARCO has been applying an Eco-responsible approach in every industrial process and in new product developments.

Our extensive know-how both of the horticultural sector and of the plastic industry enables SOPARCO to design and develop high-quality products with the minimum environmental impact.

Light yet durable products.

Nearly endless possibilities of shapes to answer a wide range of technical requirements (such as multi-tier pot base, reliable label slots...).

Production automation.

High resistance to weather conditions.

Easy storage.

Easy product customisation (pot colour, pot printing, use of IML etc).

Affordable material.

Recycled and recyclable material.

Because it perfectly meets the requirements of professional plant growers.

The use of our products in an aquatic environment requires special attention. Make sure to organise their collection after use so they won't pollute the aquatic environment. Like all end-of-life plastics, our products must be disposed of in an appropriate bin or recycled in a waste-collection facility. The only harmful plastic is the one ending up in nature.

OUR CSR APPROACH

Plastic is one of the easiest material to recycle (**)

Soparco keeps adapting its range in order to comply with European environmental regulations.

Our aim is to offer products that can be recycled after use to meet the objectives of the upcoming European targets for plastics in a circular economy.

100% of our products are recyclable

PRODUCTION

- Weight reduction of our products while maintaining their mechanical properties.
- Electric injection-moulding machines to reduce our energy consumption.
- Reduction of the products made from polystyrene replaced by products made from polypropylene.

RECYCLED MATERIAL

- Over 80% of the materials used in our manufacturing process are sourced from recycled materials.
- Many products are now also available in Post-Consumer Recycled Material in several colours.

RECYCLING

- Our standard colours (except Black 01) are NIR detectable. This enables their sorting in waste-collection facilities which means they can then be recycled.
- SOPARCO works with major waste sorting actors to enhance the effective recyclability of plastics in the context of a circular economy.
- In France, these partnerships have resulted in the implementation of the «HORTI-ECO» system. This system is based on the collection and recycling of used pots. Please contact us for more information.

STANDARDS AND CERTIFICATIONS

- All the pigments we use comply with the REACH regulation.
- Cyclos certification ensuring compliance of the material density as well as of the NIR detectability of our products, as required in waste-sorting centres.

**Source: Resources, Conservation and Recycling – Volume 105, Part A, Pages 186-197

OUR CSR APPROACH

In a context where economic, social and environmental challenges are closely interconnected, Corporate Social Responsibility (CSR) stands as a key driver of sustainable development for SOPARCO.

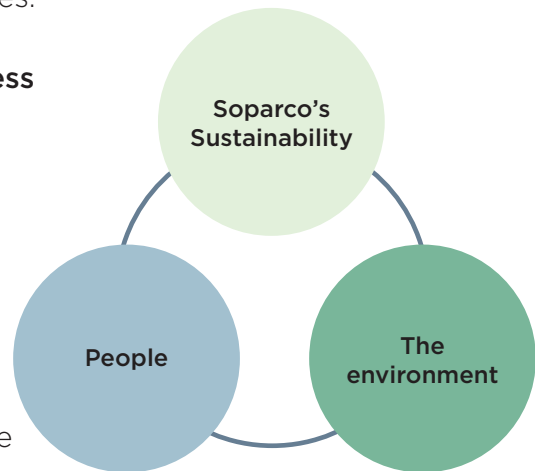

Our commitment is built around three main principles:

Ensuring the long-term sustainability of our business through responsible and innovative growth;

Valuing people, through concrete actions that promote employee well-being, inclusion, and strong local commitment;

Protecting the environment by reducing our ecological footprint through the use of recycled materials and optimisation of our production processes.

This global approach allows us to build a sustainable and resilient business model that creates value and meaning for all our stakeholders.

From these three core principles, we have defined key priorities specific to our company, around which we structure all our concrete actions:

- 1 Developing our employer brand**
- Promoting employee loyalty and motivation
 - Improving the working environment
 - ...

- 2 Reducing and controlling our environmental impact**
- Carrying out a carbon footprint audit
 - Optimising energy consumption through the use of modern and energy-efficient machinery
 - Using recycled and recyclable materials
 - ...

- 3 Protecting people and their skills**
- Mentoring production operators
 - Offering technical and vocational training
 - ...

- 4 Securing our property and strengthening cybersecurity**
- Improving fire prevention systems
 - Strengthening IT security to prevent cyberattacks
 - ...

- 5 Being a responsible and ethical business**
- Partnering with the Condé-sur-Huisne primary school to educate children about environmental issues through plastic recycling
 - Maintaining a high score on the gender equality index
 - Building stronger local connections through diverse partnerships
 - ...

- 6 Ensuring the long-term sustainability of SOPARCO and the future of horticultural containers**
- Defending the industry and endorsing recycled/recyclable plastic pots
 - Continuously innovating eco-designed products
 - Exploring alternative raw materials
 - ...

GLOSSARY

PP: polypropylene

PS: polystyrene

Post Consumer Recycled Material (PCR):
recycled material originating from household waste or end-of-life products.

Post Industrial Recycled Material (PIR):
recycled material originating from industrial waste.

Recyclable: capacity of a material to be recycled for the production of another product.

Detectable: capacity of a material to be detected by infra-red lights on the sorting equipment of waste-collection centres in order to be separated from other materials thus enabling it to be recycled.

AND BIO POTS?

Soparco's ALTERECO range offers an alternative to growers who are looking for a different eco-friendly approach.

ALTERECO®

100%

made from natural materials.

0

component containing carbon from the oil industry.

Recycled PLA

is a plant-based material. We preferably use PLA from recycled sources.

TÜV Certified

BIO THERMOFORMED RANGE

ALTERECO®

Soparco's bio range of thermoformed pots are manufactured using biosourced materials.

Material

The PLA (polylactic acid) we use to produce the Altereco® products is made from plant material, preferably from recycled source. A mineral filler is added to the PLA base for opacity. Altereco® products do not integrate any component containing carbon from petrol origin.

Use

The Altereco® pots are usable with potting machines and are compatible with the same irrigation and production systems as standard PP pots. As the pots are industry-compostable, **do not plant the pot with the plant.**

Storage

Bio-sourced material are sensitive to changes in temperature and level of hygrometry. In order to avoid deformations and destacking problems, we recommend to use the products shortly upon receiving them and to store them inside in a cool and dry place. We will not be able to accept returns of goods damaged due to improper or extended storage conditions.

The ALTERECO® range is available as long as stocks last.

DUO ALTERECO® 5° LOW

MARKETING SOLUTIONS

For those who wish to customise their pots, printing is a really efficient marketing tool. Today, we are able to meet your expectations thanks to different printing processes. Our sales team will advise you on the best method according to your needs.

PRINTING

Flexography printing

This process enables to make a full-colour printing with a photographic quality. This printing technique has a great quality result. Minimum order: 20 000 pots per set.

Offset printing

This printing process delivers high-quality results with a highly precise print frame and durable printing. We can print in 1 to 4 colours (logos, text, etc.). Printing fees: quotation available on request. Minimum order: 25 000 pots per set.

Silkscreen printing

High quality printing on round or square products.

IML (IN-MOULD LABELLING)

With this technology, a pre-printed polypropylene (PP) label is placed inside the mould before injecting the material. Label and container become one.

The advantages of this process are numerous:

- High-quality printing.
- Unlimited choice of colours.
- Possibility to customise square-round pots including in the label slot recess.
- **Ecological solution: Container and label consist of the same material (polypropylene) and can therefore be fully recycled.**

Different products can be printed. Contact us for any request.

HOW TO PERSONALISE YOUR POTS?

- Get in touch with your Soparco representative who will advise you on the best adapted technique for your project.

Simple black printing on white label or full-colour customised label printing, we adjust our labelling solutions to your needs.

We are equipped to label all of our containers (injected pots or thermoformed pots) with labels developed according to your needs (barcode, QR code, logo, etc):

- Minimum order per pot size and label design: 20 000 units.
- Black printing on a white background: size 24 x 40 mm, 40 x 40 mm or 40 x 60 mm
- Various layouts are possible. Please see our catalogue of standard labels.

Container and label consist of the same material (polypropylene) and can therefore be fully recycled.

EXAMPLES

HOW TO LABEL YOUR POTS?

- Get in touch with your Soparco representative who will advise you on the best adapted type of label.

COLOURS

Our colour range allows you to make many associations between the container and the plant. It's one of the easiest way to enhance your productions.

We keep a close eye on the new colour trends.

We offer the largest off-the-shelf colour range of the market and a great flexibility to develop bespoke colours.

REACH REGULATION

ALL THE PIGMENTS WE USE COMPLY WITH THE REACH REGULATION.

OUR LABEL ATTACHMENT SYSTEMS

Bedding trays and several Soparco containers are provided with an attachment system. You can easily place labels, carrying handles and label stakes in order to set up your marketing solutions.

The Soparco labelling system is explained below:

C: Clip

Curved slots at the end of the bedding plant trays.

F: Slot box

The curved slot is placed in the bottom of the slot box.

G: Box with teeth

Box height = 8 mm or more
The 4 teeth block the label inside the box.

Face view

G2: Box with teeth

G2: (new model)

Box height = 7 mm or less
The 4 teeth located inside the box block the label

Face view

G5: Box with teeth

LABEL STAKES

- Added value to plants
- Good presentation of the label
- The label remains upright

:Internal bottom tray dimensions determine the number and size of soil blocks per tray. Samples of bedding trays can be provided to you or your machine supplier to adapt your equipment

- Examples of soil block sizes:
- 3 x 3 cm = salads, spinach
 - 4 x 4 cm = cabbages
 - 7 x 7 cm = tomatoes, courgettes and cucurbits

- Increased efficiency for transport
- Dimensions adapted to optimise the loading of CC trolleys.

Our Sopafix® are designed to fit the rim of each pot. There may be several Sopafix® versions for the same pot diameter, depending on the width and height of the pot's rim:

Sopafix® 21/2 and 21/4

Sopafix® 21/2 + 4L SMV
and Sopafix® 21/4 + Duo 21

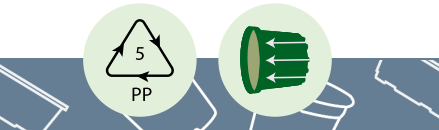

You can find the appropriate Sopafix® reference for your pot in the column listing the suitable Sopafix®.

A GLOBAL SOLUTION FOR ALL YOUR PRODUCTIONS

An «eco-friendly» container

The innovative research and highly technical manufacture of the SX container highlights SOPARCO'S eco-responsible approach through:

- The reduction of material weight while maintaining good mechanical properties.
- The use of presses with low energy consumption.
- The use of recycled materials for the production of black and some colours.
- Minimal carbon footprint.

1L SX

3-tier bottom:

- Geometry of the bottom providing a perfect substrate aeration.
- 25 evenly distributed holes in order to ensure an optimal drainage.
- Improved drainage due to star-shaped drainage system.
- Central post, in contact with the ground for a good stability of the bottom and optimal drainage.
